## Climate Change Mitigation - News Journal/Article

I. Title: The Lake Pontchartrain causeway bridge. Why the 100 year flood?
Journal of the Louisiana section. American Society of Civil Engineers. (2013).

**Description:** In summary, the Lake Pontchartrain Causeway Bridge was made possible through the collaboration of some of the greatest civil engineering minds of their time using technologies that were innovative and imaginative. This is why the Lake Pontchartrain Causeway Bridge has been designated a National Historic Civil Engineering Landmark.

3. Title: The Amazon's vicious cycles: Ecological and Climatic tipping points of the world's largest tropical rainforest and practical preventive measures.

Gland, Switzerland: WWF. Nepstad, D. C. (2007).

**Description:** The aim of this report is to explore the relationship between the Amazon, climate, and the changes in this relationship that are underway as a result of forest destruction and the release of heat-trapping gases into the atmosphere. It seeks to interpret the best information available to determine how close we are to a point of no return for a major forest "dieback" in the Amazon, and to identify some steps that might be taken to counter this process. Project for Public Spaces. What makes a successful place?
