

# Climate Change Mitigation - Workshop Proceedings

## I. Title: Mitigation on the Ground – 2011 National Hazard Mitigation

**Practitioners Workshop. Proceedings.** Natural Hazard Mitigation Association. (2011).

**Description:** The Natural Hazard Center was created 35 years ago with the goal of bridging the gap between researchers, policy makers and practitioners. Looking at the development of NHMA, we now have the opportunity for a tremendous partnership between a grassroots organization made up of mitigation practitioners and those engaged in research at the Hazards Center and other disaster research centers.
