

Climate Change Adaptation - Summary Report

- I. Title: Effects of climate change on the sustainability of capture and enhancement fisheries important to the poor: Analysis of the vulnerability and adaptability of fisher folk living in poverty.** Allison, E. H., Adger, W. N., Badjeck, M. C., Brown, K., Conway, D., Dulvy, N. K, Halls, A., Perry, A.,& Reynolds, J. D. (2005).

Description: The analysis in this report provides a basis for targeting future interventions to support adaptation to future climate change among poor fisher folk and in fishing dependent regions but there remain several key knowledge-gaps that constrain our ability to advise on appropriate means to implement such interventions. These knowledge gaps are briefly summarized here.
