

Climate change adaptation - Videos

- I. **What if we change – Climate Adaptation Efforts in Africa [Video file].** Barbee, J. (2013, May 17).

Description: The Mbaula Chititezo Stove and Rocket Barns are pioneering technologies that are saving forests in Malawi and reducing carbon dioxide emissions in the process. Hestian Innovations, an Irish company, uses micro loans and carbon financing to provide cook stoves and barns for tobacco curing simple technologies that use less wood in one of the most deforested nations on Earth.
