1. **Title: This Preschool double as an Urban Farm. Co.Exist.** Adele, P. (2016, February 25).

Description: It's becoming more common for teachers to take elementary school students outside to get a math or science lesson especially in places like California, where the state hopes to add a garden to every school. But a new design takes the idea of the school garden further: Instead of a small plot on the corner of a playground, the entire school is a farm.

2. **Title: What Mexico City Learned by devoting an Office to designing Public spaces. Citiscope.** Scruggs, G. (2016, March 31).

Description: Mexico's sprawling capital city is so big that authorities aren't even sure how many people live here. But inside the municipal government, there's a small team of designers and architects who are committed to humanizing the urban chaos through sensitive interventions in the built environment.
