

Weather and Climate - Power Point Presentation

I. The Inconvenient truth about 2015: Face the future of Africa ACMAD-MESA (2015).

Description: All ACMAD-MESA Seasonal Climate Forecasts since September 2015 provided ample evidence that flooding events are expected in Eastern Africa and drought in Southern Africa. Thus, there is no escape and no excuse any more for not facing the future. And, the strongest El Niño signal ever recorded.
